Education

M.Sc. Artificial Intelligence, Queen Mary University of London — London, UK
Distinction (2:1) (78%) — Sept 2024 – Present
Courses- Neural Networks and Deep Learning, Information Retrieval, Applied Statistics, Ethics
Projects- Farsi Vowel Classifier (GA+NN), Image Search Engine, CIFAR-10 Image Classification (NN)
Societies- QM Machine Learning (QMML), QM Badminton Men's First Team

B.Tech. Computer Science and Engineering, NIIT University — Rajasthan, India
GPA- 6.67/10 — Jul 2019 – Jul 2023
Courses- AI, Object-Oriented Programming, Software Engineering, DSA, Cloud Computing, Probability Theory
Projects- Context-Based Sarcasm Detection, Hand Gesture Recognition, Deal Finder WebApp (MERN Stack)
Honors- Winner, Nano Electronics Premier League (ERASMUS+)
Societies- Rangmanch, TEDxNIITUniversity (Co-Organizer)

High School Diploma, Delhi Public School, R.K. Puram — New Delhi, India
Final Result - 84% — Apr 2018 – Apr 2019
Awards- Gold Medal for Co-Scholastic Excellence (2012-2019), Captain - Badminton Team

Skills

Languages- Python, C++, Java, JavaScript, TypeScript, SQL
Databases- PostgreSQL, MongoDB, Milvus
LLMs- Google Gemini Flash 2.0, GPT-2
Cloud/DevOps- Microsoft Azure, Docker, Git, Kaggle, Google Colab
Frameworks/Libraries- PyTorch, TensorFlow, Scikit-learn, OpenCV, Mediapipe, Hugging Face
Web Frameworks- React.js, Node.js, Express, Django
Independent Certifications- Microsoft AI/ML Engineering (Coursera), Algorithms - Specialization (Coursera), NLP with Python (Udemy)

Competitions

Global AI Hackathon '25 (Elucidata) — Rank- 242/355
Core Challenge- Predict biological cell distribution on H&E slides (Kaggle hosted)

Stanford RNA 3D Folding Challenge — Current Rank- 664/1489
Core Challenge- Develop ML models to predict 3D structures of RNA molecules.

Work Experience

Project Associate, Machine Learning – Indian Institute of Technology, Madras — Chennai, India
Jul 2023 – Aug 2024
- Consulted on the project titled **"Machine Learning based design and fabrication of Multilayered Microwave Absorber"**.
- Accelerated material selection and simulation processes by developing Genetic Algorithm models using data from material scientists, drastically reducing cycle time compared to traditional simulation methods.
- Generated 400 combinations of multilayered dielectric stacks optimized for high EMI absorption at 8-12 GHz frequencies using the Transfer Matrix Method (TMM), and built Random Forest models for prediction and validation.
- First author of the Manuscript published in the Journal Polymers for Advanced Technologies.

Technology Consultant Intern – Mettl — Gurugram, India
Jan 2023 – Jun 2023
- Designed client-specific assessments for campus hiring, lateral recruitment, and L&D initiatives based on job descriptions, required skills, and experience levels.
- Mapped questions from domain-specific banks (e.g., SQL, Programming, Aptitude) according to difficulty levels based on hierarchal position of role (entry, mid-level, managerial).
- Supported client interactions by understanding hiring needs and aligning assessment design accordingly.
